我会造句 ☆ ☆ ☆

Read and complete.

Today it's fast for us to communicate(沟通)with each other.But how did people contact(联系, 联络)with each other long time ago? Let's read!

 Telephone	
1876	<p>In 1876,Alexander Graham Bell invented telephone.By using telephone,people can talk to each other across long distances(距离)in real time(即时地).When you call your friend in one country,he or she can answer your call right away(立即)in another country.</p>
 Internet	
The 21st century	<p>In the 1960s, J.C.R, Licklider came up with(提出) the idea of Internet. The Internet changes the world, It makes the world smaller. People from different places can communicate with each other in real time, Today we can talk, share pictures and videos with our friends in different ways.</p>
 Carrier pigeons	
2,400 BC(公元前)	<p>Around 2,400 BC,people started to send letters by pigeons. But it took too much time for pigeons to fly from one place to another, Pigeons usually needed one week or more to send a letter from one town to another. And sometimes letters were lost.</p>
 Telegraph	
the 19th century (世纪)	<p>In the 1830s, the American Samuel Morse invented(发明) telegraph. It was much faster than the carrier pigeons, One sent a telegram(电报) in London at 8:00 am, The other might get it in New York at 10:00 am. But it was expensive to send a telegram, so a telegram was very short.</p>

不同的通信方式花费的时间不同, 请根据花费时间长短给以下通信方式排序

Internet telegraph carrier pigeons telephone

_____ > _____ > _____ > Internet

根据材料内容,完成下面的信息卡

Way of communication	_____
Inventor(发明人)	Samuel Morse
Advantage(优点)	_____
Disadvantage(缺点)	It was too expensive.
